## Education

**Bachelor of Technology in Computer Science and Engineering**

**2021-2025**

*D.Y. Patil College of Engineering and Technology, Kolhapur*

*CGPA: 7.87/10*

## Achievements

**1<sup>st</sup> Prize – Rapidthon Hackathon, Govt. Polytechnic Kolhapur:** Built a Flutter app to digitize campus parking with roll number-based vehicle registration and fine management.

## Experience

**Zanver Group of Industries** 

**Aug 2024 – June 2025**

*Flutter Developer Intern*

*Kolhapur*

- Developed a mobile application using Flutter for **RFID**-based Pattern Box Searching with the **Chainway C72 UHF RFID Reader**.
- Integrated the app with the Chainway **C72 RFID** Reader device using its official **SDK** to enable long-range (up to 30m) RFID tag scanning for accurate pattern box detection.
- Enhanced inventory and warehouse operations through real-time RFID reading, intuitive Flutter UI, and seamless hardware-software integration.

**Siddham Innovation and Business Incubation Center** 

**Apr 2024 – Dec 2024**

*Flutter Developer Intern*

*Kolhapur*

- Built a Flutter application for Sibic to manage visitor details, maintenance, and bills, involving planning, coding, and testing.
- Implemented **RESTful API** integration between the mobile app and Spring Boot backend, achieving **95%** crash-free execution during internal testing..
- Implemented the project using Flutter and **GetX** for efficient state management, ensuring a streamlined development process and responsive UI.

## Projects

**E-Commerce App** | *Flutter, Dart, Firebase, Android Studio* 

**January 2025**

- Built a scalable e-commerce application using Flutter for cross-platform (Android/iOS) functionality and a consistent, responsive user interface.
- Integrated Google's Firebase backend services for secure Authentication (login/signup), real-time data handling with Firestore (products, orders), and user profile management.

**AI-Powered Assistive System for the Visually Impaired** | *Python, PyCharm, NVIDIA Jetson* 

**July 2024**

- Developed an AI-powered assistive system for the visually impaired with real-time object detection, face recognition, and text-to-speech capabilities.
- Integrated features like currency detection, weather updates, and voice commands for smooth, hands-free interaction.
- Deployed on **NVIDIA Jetson Xavier NX** with GPU acceleration and live camera input, achieving **90% accuracy** in real-time scene analysis and audio feedback.

## Technical Skills

**Languages:** Java, Python, Dart, SQL

**Development:** HTML, CSS, Flutter, Getx, Provider, MediaQuery, Firebase, RESTful API

**Developer Tools:** Git, Github, VS Code, Android Studio, IntelliJ IDEA

**Course Work:** DBMS, OOPS, Computer Network, Operating System

## Certifications/Publications

- \* *"AI-Powered Assistive System For The Visually Impaired"*, published in **IJCRT**, Vol. 13, Issue 4 (Apr 2025) 
- \* Android Development Virtual Internship - AICTE
